Software Development Portfolio

Mouse Guide | mouseguide.net | github.com/gtfotis/walk-disney   July 2021
- Mouse Guide is a Disney World vacation planning app where users can create an account and choose activities, dining, and lodging from different parks and add them to their itinerary. The goal was to take some of the stress out of planning a Disney trip by putting easily accessible information in one place.
- Primary responsibilities included: seeding the database utilized throughout the site for each park's activities, lodging, and dining options as well as managing the github repository and implementing CSS/HTML changes throughout.
- JavaScript, Node.js, PostgreSQL, CSS3, HTML5

PokéSpace | alyssadicarlo.github.io/pokespace | github.com/alyssadicarlo/pokespace   June 2021
- This app is a play on the popular social media site MySpace. The user can search for a specific Pokémon and view many details about the Pokémon that Pokémon fans may view as important to gameplay.
- Primary responsibilities included implementing a functioning Game Boy Advance emulator within the site as well as constructing the about us page and CSS/HTML throughout.
- Vanilla JS, CSS3, HTML5, Bulma, Bootstrap

Spelling Nemesis | github.com/david-vasek/python_game_project-   May 2021
- Spelling Nemesis is a role-playing game that instills the urgency of proper spelling. The player awakens to find that their concept of the English language has been fractured and must attempt to relearn a few key letters in order to defend against or attack the Spelling Nemesis.
- Primary responsibilities included the design of and implementation of sound throughout the game as well as graphics and rigging the flow of the game.
- Python3, Pygame

Professional Work Experience

Asia Direct, Inc. | Operations Manager | Norcross, GA   August 2017 – June 2020
- Managed the daily operations of both the Norcross and Tucker branch which included: distributing an average of $200,000 in product monthly in a timely manner, ensuring that the inventory was accurately updated, receiving bi-monthly shipments, and maintaining inventory.

U.S. Marine Corps | Corporal, Finance Technician | Camp Pendleton, CA   May 2014 – May 2015
- Handled case-by-case pay discrepancies for Marines stationed on the West Coast in a timely manner.
- Liquidated outstanding debts caused by system errors resulting in overpayments to Marines and utilized MCTFS to prevent system errors in the future.
- Performed duties required of a Non-Commissioned Officer such as: mentorship, auditing junior Marine's work, and holding junior Marines to the Marine Corps standards.

Education

DigitalCrafts | Certificate in Software Engineering | Atlanta, GA   May 2021 - August 2021
- Software engineering training program covering full-stack development including, but not limited to JavaScript, Node.js, and responsive CSS. Program emphasis was on server-side technologies including Express and PostgreSQL and cutting-edge frameworks like React/Redux.

Georgia State University | Atlanta, GA   January 2013 – May 2017
- Completed 70 credits towards a BA in Finance.
